IDENTIFIERS *University of Mississippi

ABSTRACT

This first annual publication from the University of Mississippi's Bureau of Institutional Research and Planning summarizes data concerning the university's academic operations in the immediately preceding academic year. The report provides both an historical context in which to review the university's development and a realistic set of statistical parameters from which to plan for its future. Sections include: entering student information; enrollment related information; student enrollment by program; and institutional support operations. Highlights noted include: high school grade inflation reported by entering students is apparent; the enrollment of female students on the Oxford campus has grown almost 2 1/2 times in the past 14 years; the School of Business Administration has grown markedly in recent years; the apparent limited number of majors indicated in several areas raises questions concerning their long-term viability; and more than half of all expenditures at the university are made in direct support of its commitment to instruction, research, and public service. This fact book was an award winner at the 1980 Annual Forum of the Association of Institutional Research. (LC)

PREFACE

In January 1979, the role of the Bureau of Institutional Research was expanded to include direct support of planning at the University and its designation changed to the Bureau of Institutional Research and Planning. Among the tasks assumed by the Bureau at that time were:

(a) The development of an expanded capability to provide recurring reports concerning the University's academic operations.

(b) A focus on the development of analytic studies and projections to support academic and institutional planning.

(c) The design of a planning process through which University administrators, in conjunction with the faculty governance structure, might more systematically plan for the future of the University.

While these and other functions of the Bureau will show substantial further progress during the forthcoming academic year, this publication represents one of the initial steps toward accomplishment of these tasks.

Statistical Profiles of the University of Mississippi, 1978-79 is the first of an annual publication designed to summarize data concerning the University's academic operations in the immediately preceding academic year. This summarization provides both an historical context in which to review the University's development and a realistic set of statistical parameters from which to plan for its future.

While the "statistical" profile clearly represents only one view of our University, it is a point-of-view with increasing importance. We suggest your careful review of the enclosed data and their use as we move toward the future development of the University.

Porter L. Fortune, Jr.
Chancellor

Harvey S. Lewis
Vice Chancellor

FOREWORD

Several months ago the Bureau distributed a questionnaire to over fifty department chairpersons, deans, and other administrators concerning data that they felt would be useful to review annually in preparation for the next academic or fiscal year. This publication is one of the results of that survey.

Statistical Profiles, 1978-79 represents a summarization of that data considered useful by the respondents which was readily available in the Bureau or other components on the campus. The data presented are the work of not only the Bureau, but many administrative staff in components such as the Office of the Registrar, Office of Personnel, Administrative Data Processing, Student Personnel, the Office of the Director of Budgeting and Accounting, and many others. The data are, in many cases, those reported as officially representing the University and, unless otherwise indicated, reflect only the Oxford Campus of the University of Mississippi.

Future editions of Statistical Profiles will evidence a substantial degree of change as:

(a) The suggestions made in response to the questionnaire referenced above are more fully implemented.

(b) New analytic studies concerning University operations are made operational.

(c) Data in the University Student Information System become more refined and accurate.

(d) Additional areas of information are added to scope of the publication.

(e) More extensive use of graphic data presentations is implemented.

We seek your guidance and suggestions concerning this publication. Each suggestion for its improvement will be seriously considered.

Katherine Adams
Research Statistician

Jim Nichols
Director

SECTION I

ENTERING STUDENT INFORMATION

The offering of service to its constituents is the primary purpose of most institutions of higher education. In an effort to better understand and, therefore, serve its students the University of Mississippi collects information concerning the origin of its incoming freshmen students, their academic potential (as measured by ACT scores), and their reasons for choosing the University. In addition, data are presented concerning the enrollment of transfer students which constitute a significiant portion of the University's incoming students.

Highlights:

(1) The maintenance and slight improvement in composite ACT scores of entering freshmen students during the last three academic years is an encouraging trend.

(2) High school grade inflation reported by entering students is apparent.

(3) The overall growth in full-time first-time freshmen experienced until Fall Semester 1978 is responsible for much of the overall University enrollment growth.

(4) The predominance of "field of study" as the most important factor in students' choice to attend the University of Mississippi is similar to the national pattern.

(5) The declining interest in majors in Education and maintenance of high levels of expectations for majors in Business and Commerce, Engineering, and Allied Health Professions also reflect national trends.

(6) The sharply rising estimated total family income before taxes reported by entering freshmen may be partially attributed to inflation.

(7) The substantial decline in full-time transfer student enrollment experienced during the Fall Semester 1978 cannot be continued without severely limiting future University enrollment.

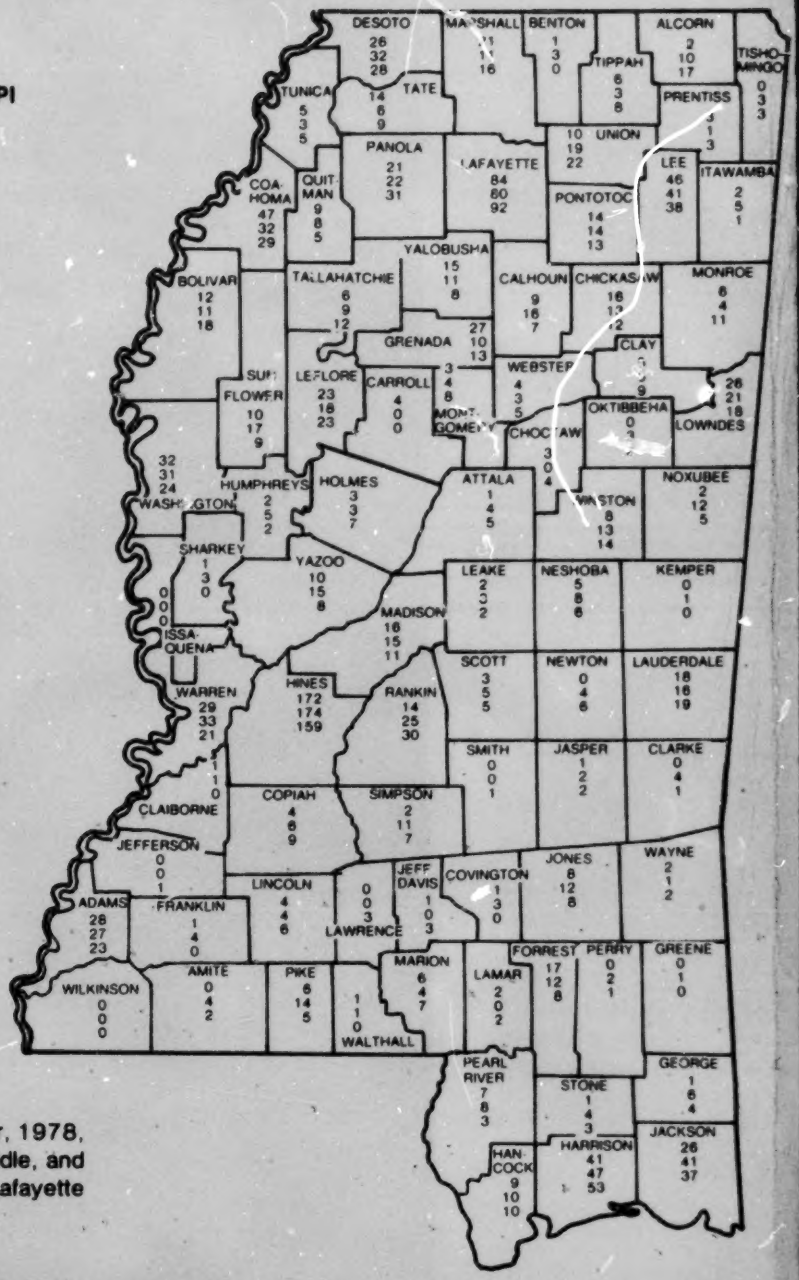
FIRST-TIME FULL-TIME FRESHMAN ENROLLMENT AT THE UNIVERSITY OF MISSISSIPPI BY COUNTY OF ORIGIN FALL SEMESTER, 1976— FALL SEMESTER, 1978



Explanation: In each county, that data relating to Fall Semester, 1978, is listed at the top, that data concerning Fall, 1977, in the middle, and that data relating to Fall, 1976, at the bottom. Therefore, from Lafayette County the following enrollment pattern is noted: 1978 = 84
1977 = 80
1976 = 92

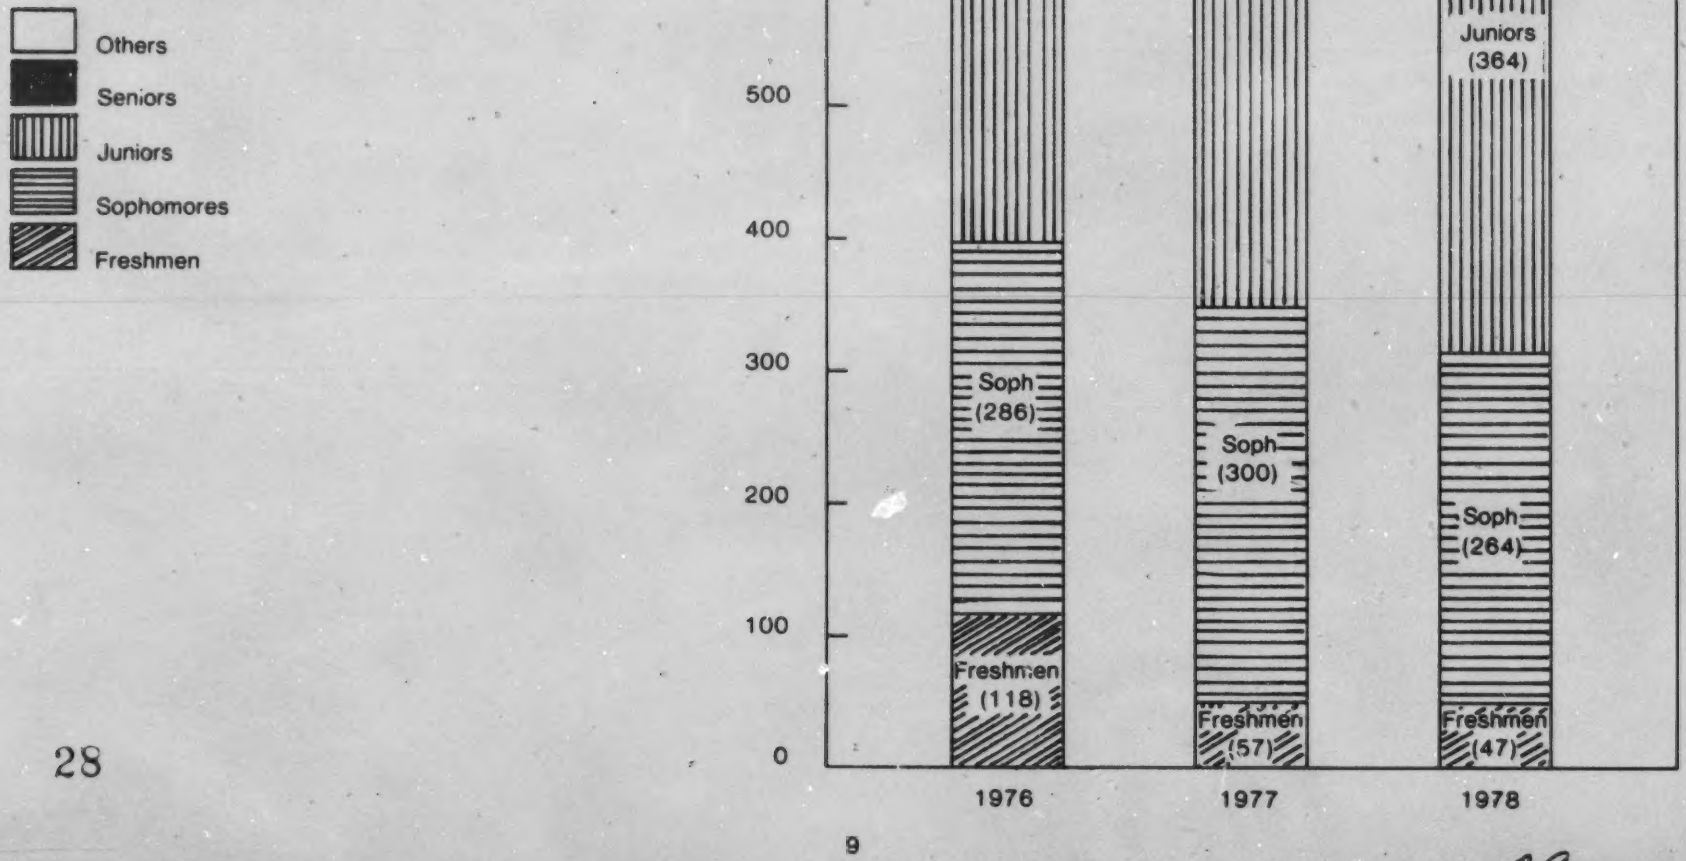
FULL-TIME TRANSFER ENROLLMENT BY STUDENT LEVEL AT THE UNIVERSITY OF MISSISSIPPI FALL SEMESTER, 1976—FALL SEMESTER, 1978



SECTION II.

ENROLLMENT RELATED INFORMATION

The information presented in this section is a natural extension of the University's interest in the data provided concerning its entering freshmen and transfer students. Data reflecting both the Oxford and Medical Center enrollment and separate data concerning solely the Oxford Campus are included. In addition, the University enrollment is placed in context with the other institutions in the state.

Highlights:

(1) The combined enrollment at the University of Mississippi Oxford Campus and Medical Center has grown each year, with the exception of the 1973-74 academic year, for the last 14 years and during that period of time has almost doubled.

(2) There were more full-time students enrolled on the Oxford Campus in the Fall Semester 1978-79 than at any time during the previous 14 years.

(3) The enrollment of female students on the Oxford Campus has grown almost 2 1/2 times in the past 14 years.

(4) The bulk of the University's Oxford Campus enrollment growth is attributable to the rise in undergraduate enrollment.

(5) While the Institutions of Higher Learning System enrollment pattern began a down turn in the Fall Semester 1977-78, the University of Mississippi has recorded enrollment growth during both 1977-78 and 1978-79.

SECTION III.

ACADEMIC OPERATIONS INFORMATION

As initially stated, the primary function of virtually all institutions of higher education is the provision of service to their constituents. This service usually takes place in the form of offering various educational opportunities. The act of offering these opportunities may be described as an institution's academic operations. The following data represent a summary of information concerning the academic units (departments, schools, or college) which offer courses of study at the University of Mississippi. First, data are presented concerning student credit hour production by college or school and department over the last ten academic years. Second, data concerning fall semester student credit hour production by course level are provided for further analysis. In addition, information concerning fall semester classroom utilization by building are summarized. Third, information concerning the faculty at the University of Mississippi who offer these educational services are presented. These data include faculty characteristics and average faculty compensation relative to other institutions.

Highlights:

(1) The School of Business Administration and, in particular, the Department of Economics and Finance have grown markedly in recent years.

(2) Several departments in the College of Liberal Arts, which nationally have shown declines in enrollment, such as Modern Lanugages and Philosophy and Religion have been able to maintain their level of enrollment at the University of Mississippi.

(3) The Department of Curriculum and Instruction in the School of Education has declined markedly in student enrollment since 1971-72.

(4) Enrollment in School of Engineering courses has continued to increase steadily throughout the period.

(5) Fall Semester 1978 student credit hour production in the College of Liberal Arts declined.

(6) The Departments of Chemical, Civil, Electrical, and Geological Engineering grew substantially in the Fall Semester 1978 and were instrumental in an almost 20 percent growth in student credit hour production in the School of Engineering.

(7) Accommodation and Room Use Indices covering the last ten years remained relatively constant at the University of Mississippi.

(8) Faculty compensation by rank at the University of Mississippi continues to trail that at other comparable public universities offering the doctorate.

EXPLANATORY NOTES CONCERNING
FACULTY COMPENSATION DATA PROVIDED

The data presented on the next two pages relate to the nature of faculty compensation at the University of Mississippi during the 1970's.

The term "compensation" was chosen for several reasons:

(1) It is the most consistent data element available on a comparative basis throughout the 1970's concerning the earnings of faculty.

(2) Compensation includes a broader perspective of faculty reimbursement than salary calculations which do not include the significant aspect of fringe benefits.

The choice of this data element has resulted in two limitations to the comparison which must be identified:

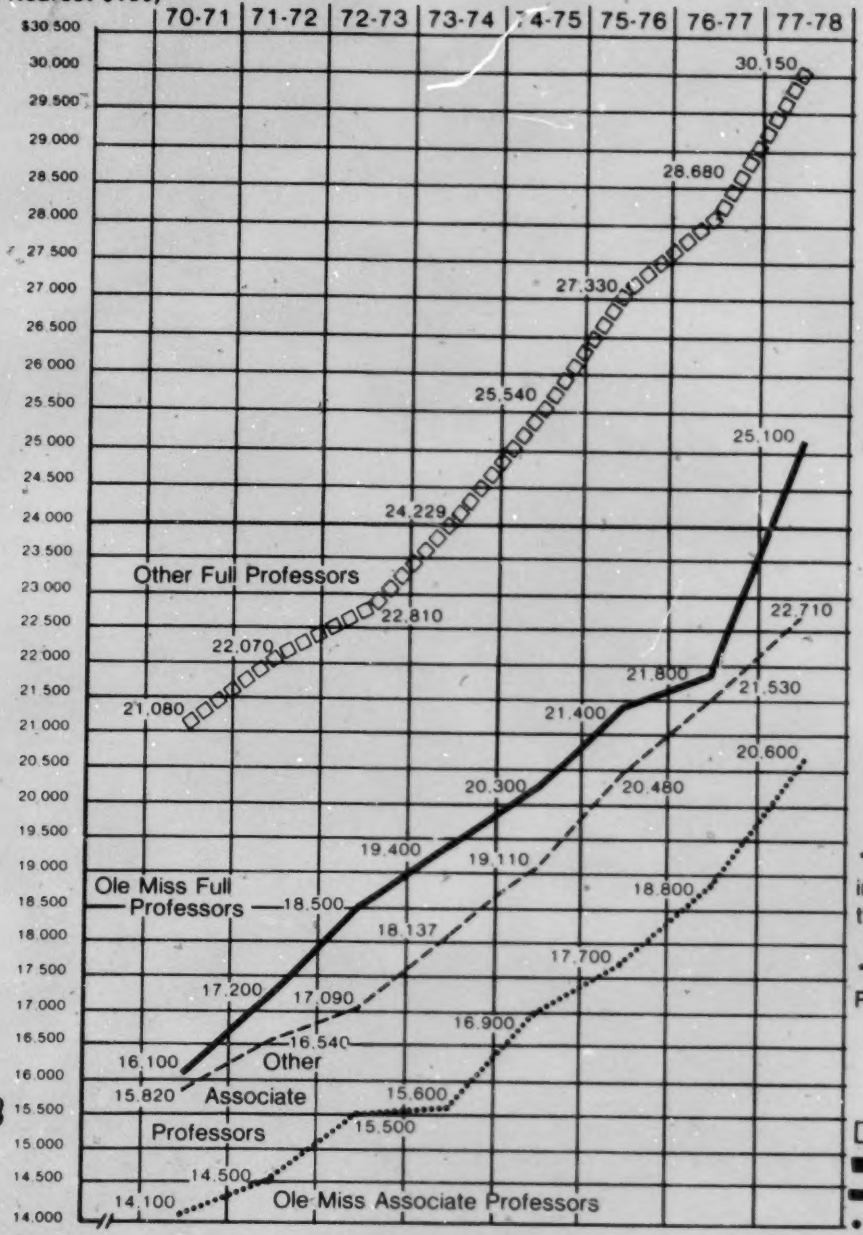
(1) Comparable data on a national basis was available for use while comparative information concerning similar institutions in the South was not available in aggregate format.

(2) The definition of compensation utilized by the American Association of University Professors includes the retirement contribution of employers only if the benefits are vested within a five-year period. This is not the case in Mississippi and, while it has little bearing on the long-term employee, it does have a significant impact upon those employees in the junior faculty ranks who anticipate continued professional growth.

While these data appear to be of such a nature so as to indict faculty salary practices at the University of Mississippi, it should be borne in mind that in a recent publication by the Academy for Educational Development, faculty salaries at the University of Mississippi at the full professor and associate professor levels were found to be the highest in the state of Mississippi while faculty salaries at the rank of assistant professor and instructor were found relatively comparable to those at other doctoral-granting institutions in the state.

At every faculty rank (full professor, associate professor, assistant professor, and instructor) the spread between the compensation of full-time faculty at the University of Mississippi and full-time faculty at other public universities granting the doctorate has increased during the period 1970-71 through 1977-78. While the amount of spread has varied and in some cases remained almost that encountered in the period 1970-71, the spread between the compensation of instructors at other public universities granting the doctorate and instructors at the University of Mississippi has almost doubled during the last eights years. Clearly, while many efforts have been made at the University of Mississippi, no improvement in the relative compensation of faculty at the University has been made during the 1970-71 through 1977-78 period.

A Comparison of Full-Time Faculty Compensation* in the Ranks of Full Professor and Associate Professor at The University of Mississippi and other Public Universities Offering the Doctorate. Academic Year 1970-71 through 1977-78**



*Compensation includes fringe benefits such as health insurance, life insurance, and employer retirement contributions (if it is vested in the employee within five years).

SECTION IV.

STUDENT ENROLLMENT BY PROGRAM

The following data relate to the enrollment at the University of Mississippi of students by HEGIS (Higher Education General Information Survey) program area. Due to the aggregate nature of these data, the relatively recent and substantial improvements in the Student Information System, and the need to further review procedures for assigning HEGIS degree designations, these data should be viewed as general in nature rather than absolute. That is to say, they provide a general overview of student enrollment and degrees received by HEGIS area; however, they should not be viewed as absolute in terms of their accuracy.

Also included in this section is an example University of Mississippi Contribution Report designed to show the interrelationship between enrollment in departmental courses and students in major fields. Contribution reports for each department were distributed during the Spring Semester 1978-79 and are available for detail review either in the department or in the Bureau of Institutional Research and Planning.

Highlights:

(1) The 27% of the University of Mississippi headcount students, who in the Fall Semester 1978 indicated a major in Business and Management, is impressive within itself. However, perhaps more impressive is the fact that this 27% was almost twice that of any other single major field in the University.

(2) The extent (11.5%) of students majoring in health related professions (including majors in Pharmacy, Communicative Disorders, and pre-professional in medicine, dentistry, and other allied health professions) is surprising.

(3) The apparent limited number of majors indicated in several areas within the University must cause some question concerning their long-term viability.

UNIVERSITY OF MISSISSIPPI
HEGIS DEGREE CLASSIFICATIONS AND HEADCOUNT MAJORS
FALL SEMESTER 1978

0200 ARCHITECTURE AND ENVIRONMENTAL DESIGN (43)
- Interior Design (16)
- Urban Planning (27)

	FIRST PROFESSIONAL (LAW)	170	169	176
	DOCTORS	84	88	74
	TOTALS BY YEARS	2,130	2,160	2,153

*While exact identification of University graduates by HEGIS Code has shifted slightly over the three academic years, the consistency of identification is sufficient to allow general utilization of the data. However, before making specific judgments concerning individual areas, users should verify the consistency of data through the Bureau.

**Students completing three years on the Oxford Campus who were awarded a baccalaureate degree at the close of their first year in medical or dental school.

UNIVERSITY OF MISSISSIPPI
CONTRIBUTION REPORT EXPLANATION
(see numbered example attached)

KEY

1. The University of Mississippi Contribution Report specifies the interrelationship between course enrollment in the departments at the University of Mississippi at specified course levels and the student majors causing those enrollments. The report quantifies this relationship by specifying the total number of student credit hours (STUDENT UNITS) taken within a given department, at a specified course level, by students of a particular major and student level. That total number of student credit hours is then expressed as a percentage of all student credit hours in all departments taken by students of a particular major (MAJR). Finally, the report describes the number of credit hours caused by specified majors and student levels as a percentage of total credit hour generation in the department (DISC).

2. Indicates the discipline and time period (e.g., Fall 1978--History Department).

3. Indicates the course level in the department*(e.g., History Department; Lower Level. This indicates that the specified department is History and that the data relate to 100 and 200 level courses).

4. Indicates the students' major and student level (e.g., Department--History; Course Level--Lower; Major--Banking and Finance; Student Level--Lower Level).

5. Indicates the total number of student credit hours taken by all students of a particular major and student level in a given course level and department (e.g., Department--History; Course L l--Lower; Major--Banking and Finance; Student Level--Lower; Causing 168 student credit hours in lower level history courses)

6. Indicates the percentage that student credit hours taken in the specified department and course level by students in the major and student level represents of the total credit hours taken in all departments by those majors. (This 168 student credit hours represents 3.9% of all student credit hours taken in all disciplines by all banking and finance majors.)

7. Indicates the percentage of all student credit hours within the specified department caused by students in the major and student level (The 168.00 student credit hours represents 3.30% of all student credit hours taken within the History Department).

---

*Course levels specified as ".50 Masters Program" are actually all graduate level courses.

(Contribution Reports for each department were distributed during the Spring Semester, 1978-79)

SECTION V.

INSTITUTIONAL SUPPORT OPERATIONS

Data in this section contain information concerning institutional, Educational and General Expenditures by functional category over the last five academic years and dormitory occupancy.

Highlights:

(1) More than half of all expenditures at the University are made in direct support of its commitment to instruction, research, and public service.

(2) More than nine cents of every dollar spent at the University is in the form of a scholarship or fellowship for attendance by students at the University.

(3) Dormitory occupancy has risen to the 95% level during recent years.

EDUCATIONAL AND GENERAL EXPENDITURE CATEGORIES*

Instruction

Accounts by divisions, schools, colleges, and departments of instruction following the administrative organization of the institution. The four functional subcategories are:

General academic instruction
Occupational and vocational instruction
Special session instruction
Community education

Research

Accounts by individual projects, classified by organizational units. The two functional subcategories are:

Institutes and research centers
Individual or project research

Public Service

Accounts by activities, classified by type of activity, such as:

Community Service
Conferences and Institutes
Cooperative Extension Service
Public Lectures
Radio
Television

Academic Support

Accounts by activities, classified by type of activity, such as:

Academic Administration and Personnel Development
Audiovisual Services
Computing Support (excluding administrative data processing), unless distributed to using activities)
Course and Curriculum Development
Demonstration Schools
Libraries
Museums and Galleries

86-A

Student Services

Accounts by activities, classified by type of activity, such as:

- Admissions Office
- Counseling and Career Guidance
- Cultural Events
- Dean of Students
- Financial Aid Administration
- Health and Infirmary Services (if not an integral part of a hospital nor operated as an essentially self-supporting operation)
- Intramural Athletics
- Registrar
- Student Organizations
- Remedial Instruction

Institutional Support -- detailed as needed, for example:

- Governing Board
- Chief Executive Office
- Chief Academic Office
- Chief Business Office
- Investment Office
- Legal Counsel
- Administrative Data Processing
- Alumni Office
- Auditing, internal and external
- Safety
- Security
- Catalogues and Bulletins
- Commencements
- Convocations
- Development Office
- Employee Personnel and Records
- Fund Raising
- General Insurance
- Interest on Current Funds Loans
- Legal Fees
- Memberships
- Printing
- Provision for Doubtful Accounts and Notes
- Publications
- Public Relations
- Purchasing
- Service Departments
- Space Management
- Telephone and Telegraph (unless charged to departmental budgets)
- Transportation (including motor pool, unless operated as a service department)

Operation and Maintenance of Plant

Accounts for all organizational units and functions, such as:

- Administration
- Custodial Services
- Maintenance of Buildings
- Maintenance of Grounds
- Utilities
- Trucking Services
- Fire Protection
- Property Insurance

Scholarships and Fellowships

Accounts as needed and desired for scholarships, fellowships, grants-in-aid, trainee stipends, prizes, and awards.
